

Natalie Spiva

Spokane, WA | acreationos.org | natalie.acreationos.org | github.com/spivanatalie64

Note on Professional Identity: While legal and historical educational documentation (pre-2026) may reflect the name Johnathan Spiva, I have transitioned to Natalie Spiva. As of January 30th, a hearing for name change has occurred. All current and future professional engagements, project credits, and communications should be directed to Natalie.

Professional Summary

High-capacity Systems Architect and Full-Stack Developer with nearly 20 years of technical experience. Expert in architecting custom operating systems, developing innovative package management solutions, and maintaining high-availability infrastructure. Solely responsible for 99.9% uptime across a complex suite of self-hosted services, managing everything from the Cloudflare backend to the user-facing frontend.

Technical Skills

Systems Architecture: OS Development (AcreationOS), Kernel customization, ScrapeC (Language Author)

Infrastructure & DevOps: Cloudflare Backend Management, Self-hosted GitLab, Nextcloud, C, Rust, Bash, Python

Web & UI/UX: Full-stack Web Development, Svelte, Cinnamon Desktop, XLibre (Wayland/X11 Hybrid)

Open Source Projects

All projects are authored or co-authored by Natalie Spiva across GitHub and GitLab.

AcreationOS

2023 – Present

Arch Linux distribution — Cinnamon, XLibre, Wayland, GNOME, MATE, Plasma, Hyprland editions

- Architected the primary acreationos.org ecosystem with 12+ desktop editions
- Maintain ISO builder, Git tracker, news tracker, and AI assistant infrastructure
- 99.9% uptime across all digital properties and mirror network

Key Projects & Repositories

acreationos • acreationos32 (i686) • AcreationOS-Cinnamon-X11 • AcreationOS-Cinnamon-XLibre • AcreationOS-Cinnamon-Wayland • AcreationOS-Mate • acreationos-gnome • acreationos-hyprland • AcreationOS-XLibre • Plasma-LTS • Moxie • Arch-Filling • acreationos-code.github.io • acreationos-news-tracker • acreationos-newsletter • acreationos-flasher • acreationos-archive-uploader • AcreationMediaWriter • acreationos-memory-manager • acreationos-terminal • acreation-appstore • AcreationOS-Tracker • acreationos-blog • aiden / aiden-desktop • arttulos / arttulos-site • yacfs-kmod • yacfs-tools • yacfs-replicate • yacfs-metrics • jalk (JALK - Just Another Linux Kernel) • ScrapeC • ace • mdg (GDM Done Right) • rettum (Mutter Done Right) • llehs-emong (GNOME Done Right) • cinderfox • OVSC • ovsc-core / sidecar / watcher / host • FlatFree • acreationos-flatpak-repo • qt-calculator • Trans_Tracker_101 • messengerpwat • Vesкто • openrouter-tui • chromiumPWA • DAN-Qwen3-1.7B • oglo • ISO • Linux-Mint-Ports • TrumpOS • ThunderOS • root-distribution • X11aw • calamares-config • AcreationOSCloud • ajs-compiler • spivanatalie64.github.io • darren (personal site) • flathub (mirror)

Experience & Leadership

Founder & Lead Architect — AcreationOS Project

2023 – Present

- Architected the primary acreationos.org ecosystem, bringing pure, stable Arch Linux to a broader audience
- Engineered a modified XLibre stack for seamless Wayland/X11 compatibility
- Authored ScrapeC, a language bridging C performance with Rust safety
- Integrated AI-forward shell and custom-designed Cinnamon environment

Lead Infrastructure Manager — AcreationOS & Personal Projects

2019 – Present

- 99.9% uptime across all digital properties
- Full Cloudflare backend management for security, DNS, and traffic optimization
- Self-hosted GitLab, Nextcloud, Mastodon, and Discourse administration
- Designed and developed all project-related websites

Co-Founder — XeroLinux

2018 – 2021

- Co-founded and architected initial releases, driving technical implementation and community support

LineageOS Developer — XDA Developers

2013 – 2020

- Began custom ROM development at age 7; contributed to LineageOS (CyanogenMod) ecosystem
- Maintained lineageos-devel AUR package and provided expert troubleshooting

Education

Meridian Technology Center — 2020 | GPA: 4.0

Stillwater High School — 2020 | GPA: 4.0
