

Natalie Spiva

Spokane, WA | acreationos.org | natalie.acreationos.org | github.com/spivanatalie64

Note: While legal and educational records prior to 2026 may reflect the name Johnathan Spiva, I have since transitioned. A name change hearing occurred January 30th. All current and future professional work should reference Natalie.

Summary

Systems architect and full-stack developer with roughly 20 years in the field. I build operating systems, design infrastructure, and keep things running. Solely responsible for 99.9% uptime across a self-hosted suite of services — from Cloudflare edge config to frontend code.

Skills

Systems & OS: AcreationOS (Cinnamon, X11, Wayland, XLibre, GNOME, MATE, Plasma, Hyprland), kernel work, ScrapeC language, JALK kernel

Infrastructure: Cloudflare (DNS, Workers, edge), self-hosted GitLab, C, Rust, Python, Bash, CI/CD

Frontend & Tools: Svelte, HTML/CSS/JS, Flatpak packaging, Cinnamon theming, YAcFS filesystem

Projects

Authored or co-authored across GitHub and self-hosted GitLab.

AcreationOS

2023 – now

Arch-based distribution — twelve desktop editions

- Designed and maintain the full acreationos.org stack: website, ISO builder, Git tracker, AI assistant, news tracker
- Keep 99.9% uptime across the mirror network and all digital properties
- Built custom ISO pipeline, USB flasher, and automated Internet Archive uploader
- Wrote a filesystem (YAcFS), a kernel (JALK), and a programming language (ScrapeC) along the way

Experience

Founder & Lead — AcreationOS

2023 – now

- Built the whole acreationos.org ecosystem from scratch
- Wrote a custom XLibre graphics stack to bridge Wayland and X11
- Designed the ISO pipeline, mirror distribution, and security monitoring
- Handle everything from DNS records to kernel patches

Infrastructure Lead — Self-hosted stack

2019 – now

- Run GitLab, Nextcloud, Mastodon, and Discourse on personal hardware
- Manage Cloudflare edge config, DNS, Workers, DDoS mitigation
- 99.9% uptime track record across all services

Co-Founder — XeroLinux

2018 – 2021

- Co-founded the distro, built early releases, handled community and infrastructure

LineageOS Developer

2013 – 2020

- Started building custom ROMs at age 7
- Contributed to the CyanogenMod / LineageOS ecosystem and maintained AUR packages

Education

Meridian Technology Center — 2020 | GPA: 4.0

Stillwater High School — 2020 | GPA: 4.0
